

## PROGETTO RANDIT - Eventi

**Seminario via WEB sull'integrazione di Qchecker nel ciclo di qualità aziendale.**

**Indirizzato ai clienti che utilizzano già Qchecker e a quelli che ancora non lo usano**

Dalmine , 6 settembre 2009

***You are invited to a Transcat PLM Online Webinar***

### **Integrate Q-Checker within your PLM process and measure benefits of your Product Data Quality Strategy**

**TRANSCAT**

A DASSAULT SYSTEMES COMPANY

Founded in 1987, Transcat PLM GmbH is a fully-owned subsidiary of Dassault Systèmes. Transcat PLM's software solutions support the design process with CATIA, DELMIA and ENOVIA. Companies around the World optimize their processes and enhance their products with solutions from Transcat PLM. Q-Checker, CAVA, myV5, VDAFS Processor and XFileV5 are helping users in the context of a global development process.

**Join this Webinar on October 21<sup>st</sup>**

Product Data Quality (PDQ) is at the centre of the PLM process. But only if implemented at significant process steps a PDQ strategy will fulfill its goal. When used from the beginning of the product development process and when applied automatically in critical phases, a strategy can ensure that all data meet a Company's standards. Q-Checker, Q-PLM and Q-Monitor have been designed to enhance this process so that all backbone systems; either a PDM system or a data exchange server, can enhance its level of quality amongst all data that is being transferred and prevent any errors from occurring when it matters.
